-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

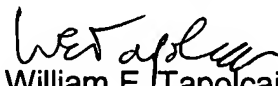

2. Claims 75-84, 86-97, and 99 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,964,177 to Lee et al in view of U.S. Patent No. 7,008,032 to Chekal et al. Lee et al, in Figs. 6A and 6B, discloses the claimed invention of a refrigerator having a refrigerating compartment 200 in the upper portion of the body and a freezer compartment 100 in the lower portion of the body. An ice making compartment 300 is located in the refrigerating compartment 200 and has an icemaker 400 therein. An ice discharge duct 320, 510 extends partially between the ice compartment and the dispenser 540 in the door of the refrigerating compartment. An obstruction member 530 is further provided in the discharge duct. However, Lee et al does not disclose the pair of doors opening and closing the refrigerating compartment. Chekal et al teaches a refrigerator having a refrigerating compartment 12 on top and a freezing compartment 14 on bottom. A pair of doors 28 and 29 opens and closes the refrigerating compartment. Thus, it would be obvious to modify Lee et al so that the refrigerating compartment is opened and closed by a pair of doors, in view of Chekal et al, to yield the predictable result that only a portion of the refrigerating compartment is exposed to the ambient and thus cold air is conserved.

3. Claims 85 and 98 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
